We Made **I.M.P.A.C.T.** In the Press

On Tuesday, May 20th WCJB TV20 News in Gainesville aired a health piece featuring The Stroke **I.M.P.A.C.T.** Study. The piece explained that we operate out of the Physical Therapy department of UF's College of Public Health and Health Professions, that **I.M.P.A.C.T.** is a five year NIH funded research grant exploring Constraint-Induced Movement Therapy (CIMT) and headed by Dr. Kathye E. Light.

The WCJB TV news report followed an original print article in UF& Shands' "*The Post*." You can view the article by going to www.hsc.ufl.edu. In the bottom right corner click on "*The Post*" archives and March 08.

Our story appears on pages 6-7. The article was also picked-up by south Florida's Sun Sentinel Newspaper.

People come from near and far to participate in this groundbreaking

CIMT research in Gainesville. We have had subjects from all over the state of Florida and as far away as Colorado. We would like to make sure the people in your area who have suffered a stroke or know of someone who has suffered a stroke, have the opportunity to learn about **I.M.P.A.C.T.**

Please share this information with your friends, doctors, therapists, neighbors and family members. Word of mouth is a very effective way to spread the word. There are many stroke victims who might qualify for and benefit from our program and you can help us reach them.

I.M.P.A.C.T. Coordinator Fran Greenberg, is available to make presentations in your area. If you know of a support group, clinic or residential community that might be interested put them in touch with us at 352-273-5274.
